## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/2007 has been entered.
2. This action is responsive to communications: amendment, filed on 10/31/2007. This action is non-final.
3. Claims 1-38 and 40-41 are pending in this application. Claims 1, 11, 12, 22, 23, 33, 34, 36 and 41 are independent claims. In the amendment filed 10/31/2007, claims 1, 11, 12, 22, 23, 33, 34, 36 and 40 were amended, and claim 41 was added.

This application claims foreign priority dated 12/22/2000.

4. The present title of the invention is "Event-for-change oriented information display method and information processing system using the same method" as filed originally.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:  

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 1-38 and 40-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject

matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1 and 33 limitation states "providing at least one of a leading line in a direction of the manipulation and a leading column in a direction of the manipulation within the predetermined display area in which the display attributes of the plurality of elements structuring the information are not changed" wherein at least "a leading line" within the context is not taught in the specification.

Claim 11 limitation states "providing at least one of a leading line or leading column within the predetermined display area in which the attribute of the information is not changed" wherein "a leading line or leading column" within the context is not taught in the specification.

Claims 12, 22, 23 limitation states "at least one of a leading line in a direction of the manipulation and a leading column in a direction of the manipulation within the predetermined display area in which the display attributes of the plurality of elements structuring the information are not changed" wherein "a leading line in a direction of the manipulation and a leading column in a direction of the manipulation" within the context is not taught in the specification.

Claim 34 limitation states "providing at least one of a leading line in a direction of the manipulation or leading column in a direction of the manipulation within the predetermined display area wherein the attribute of the text is not changed" wherein "a

leading line in a direction of the manipulation or a leading column in a direction of the manipulation" within the context is not taught in the specification.

Claim 41 limitation states "providing at least one of a first line in a direction of the manipulation and a first column in a direction of the manipulation within the predetermined display area in which the display attributes of the plurality of elements structuring the information are not changed" wherein "a first line in a direction of the manipulation and a first column in a direction of the manipulation" within the context is not taught.

#### ***Response to Arguments***

7. Applicant's arguments with respect to claims 1-38 and 40-41 have been considered but are moot in view of the new ground(s) of rejection. The amended limitation is not supported by the specification.

#### ***Inquiries***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan R Yang whose telephone number is (571) 272-7666. The examiner can normally be reached on M-F 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Razavi can be reached on (571) 272-7664. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
